Water has receded on ND highway 32 and 18 in northeastern North Dakota; Both lanes open on ND 66 at Crystal

Water has receded on ND 32, five miles north of Mountain and on ND 18, one mile north of Forest River in northeastern ND. Also flood operations on ND Hwy 66 at Crystal are complete and both lanes are now open to traffic. Speeds are also back to normal on these roadways, but motorists should be advised that conditions can change rapidly so motorists should use caution while traveling.

The following roadways remain closed due to flooding:

- ND Highway 18 at Neche due to water over the roadway. Motorists must use an alternate route.
- ND Highway 5 and ND Highway 18 are closed into Cavalier to allow city officials to conduct flood control operations. Only local traffic is allowed in the area.

The following highways are affected by flood waters, but remain open to traffic, with traffic speeds reduced:

- ND 200, two miles east of Bowdon
- ND 200, westbound lane four miles west of Hurdsfield

Fluctuating water levels make it difficult to predict when and where water will go over a roadway or recede from the roadway. The NDDOT encourages motorists to check road conditions before traveling due to rapidly changing conditions. For updated road information, call 511 from any type of phone or go to the Travel Information Map on our website at www.dot.nd.gov.

Please be advised that road condition information on 511 and the travel map is updated daily from 5 a.m. until 9 p.m. CDT. The road report is based upon the information available to the NDDOT at the time of preparation and is provided solely as a public service. Conditions may vary from those reported
